

TECH IS MAGIC

The Coloring & Creativity Book

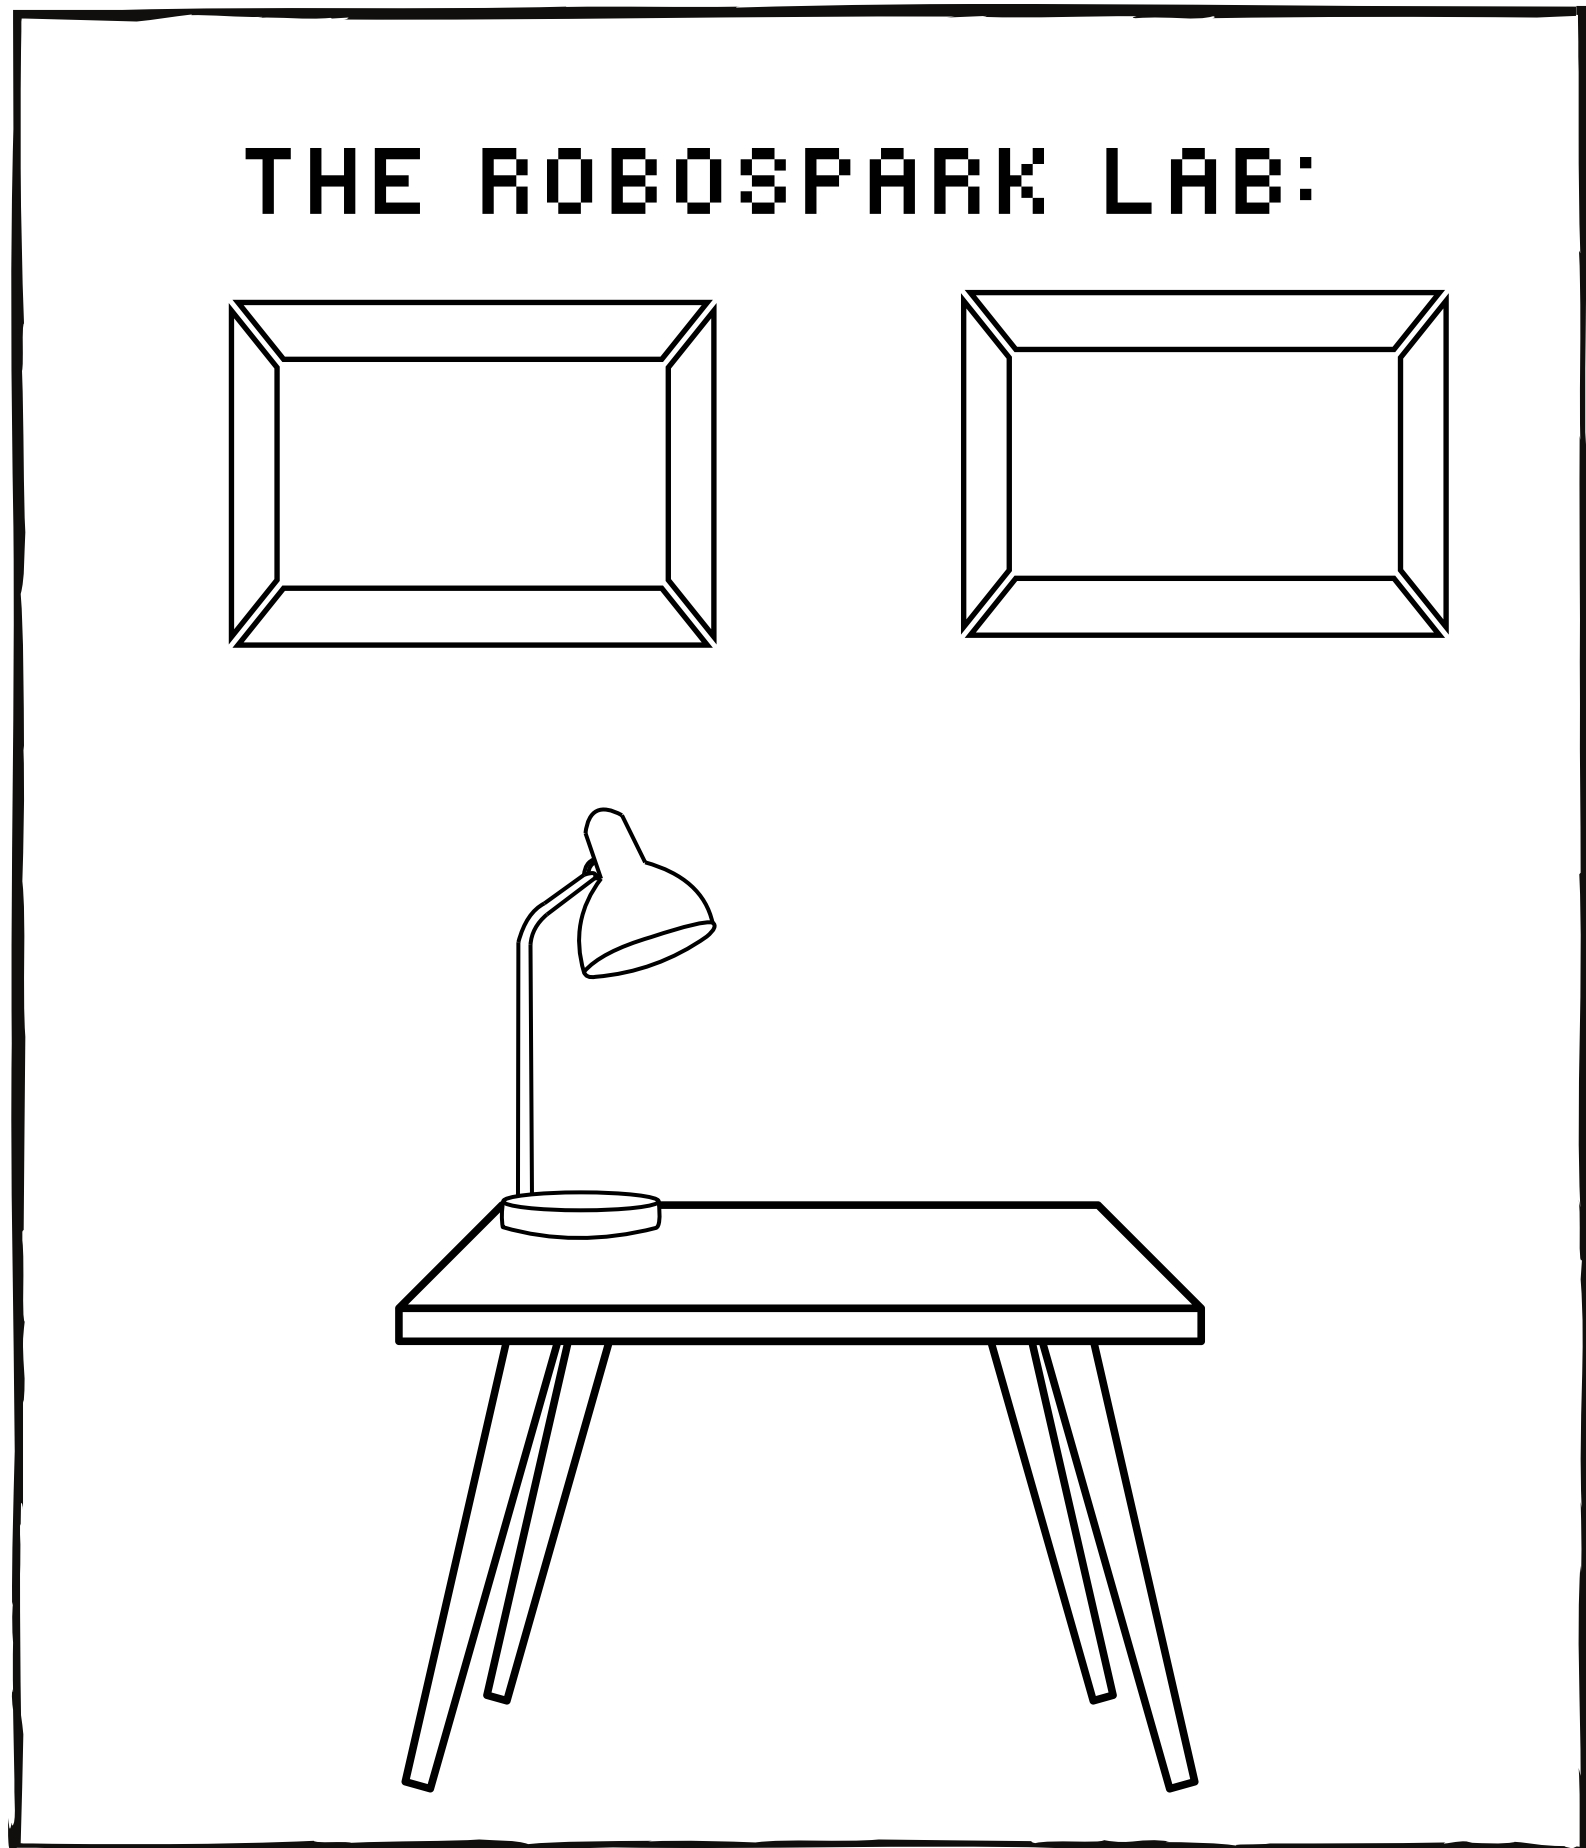

Explore, Imagine & Color the World of Technology!

Ages 5-10

STEM fun through art & imagination
Inspire the next tech innovator!

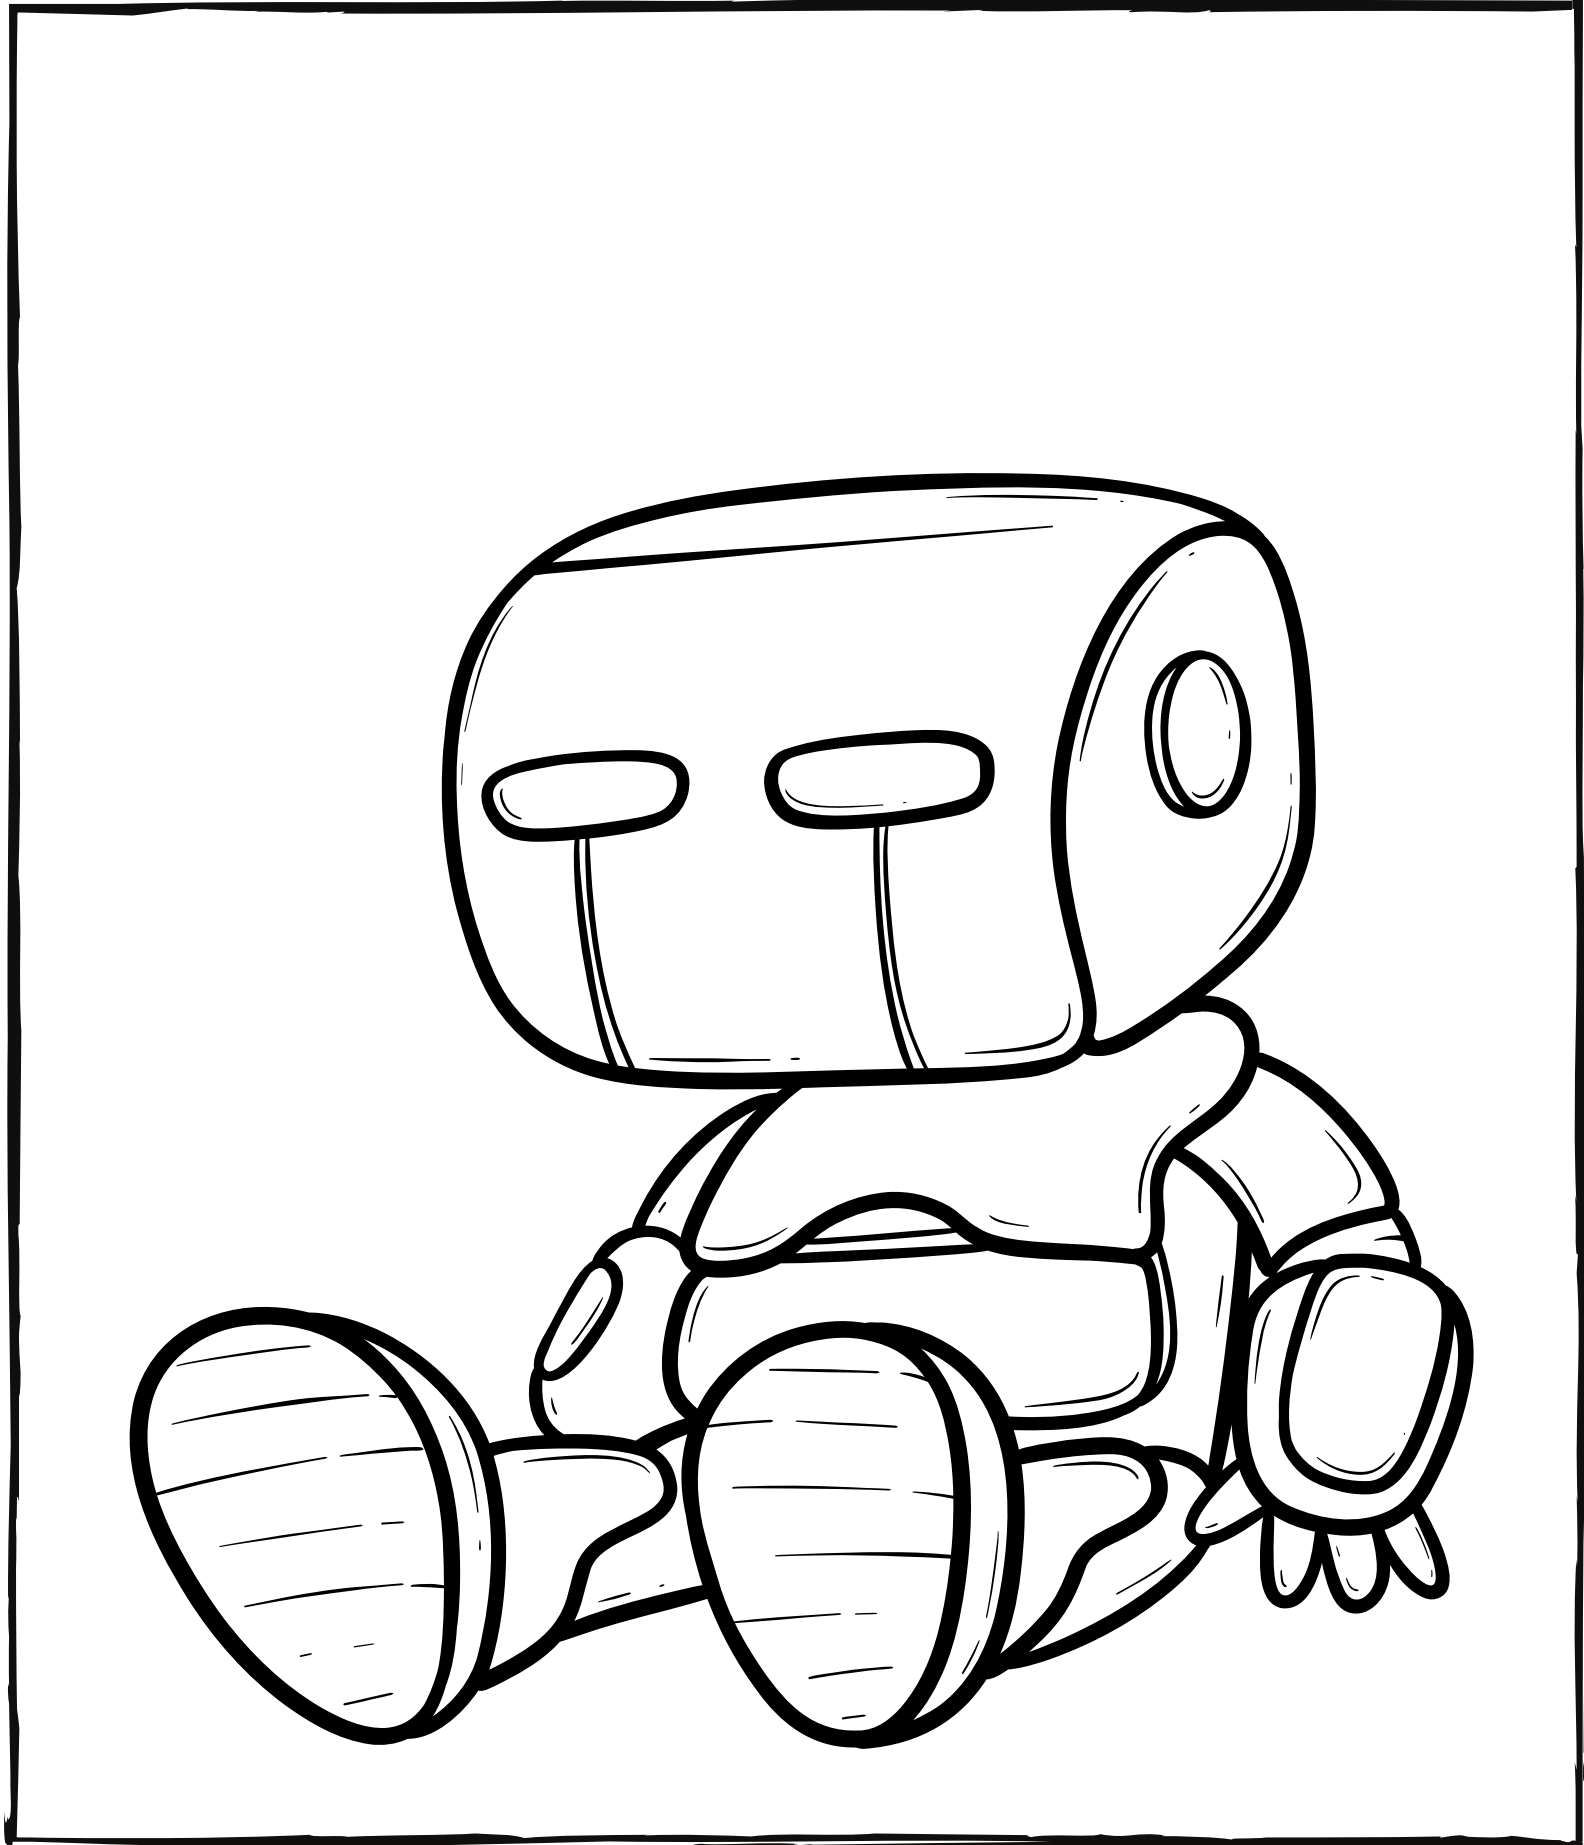

Illustrated By Taylor Simth

The RoboSpark Lab: Where curious minds build brilliant bots!
Color in your lab to make it truly yours! What's inside your secret lab?

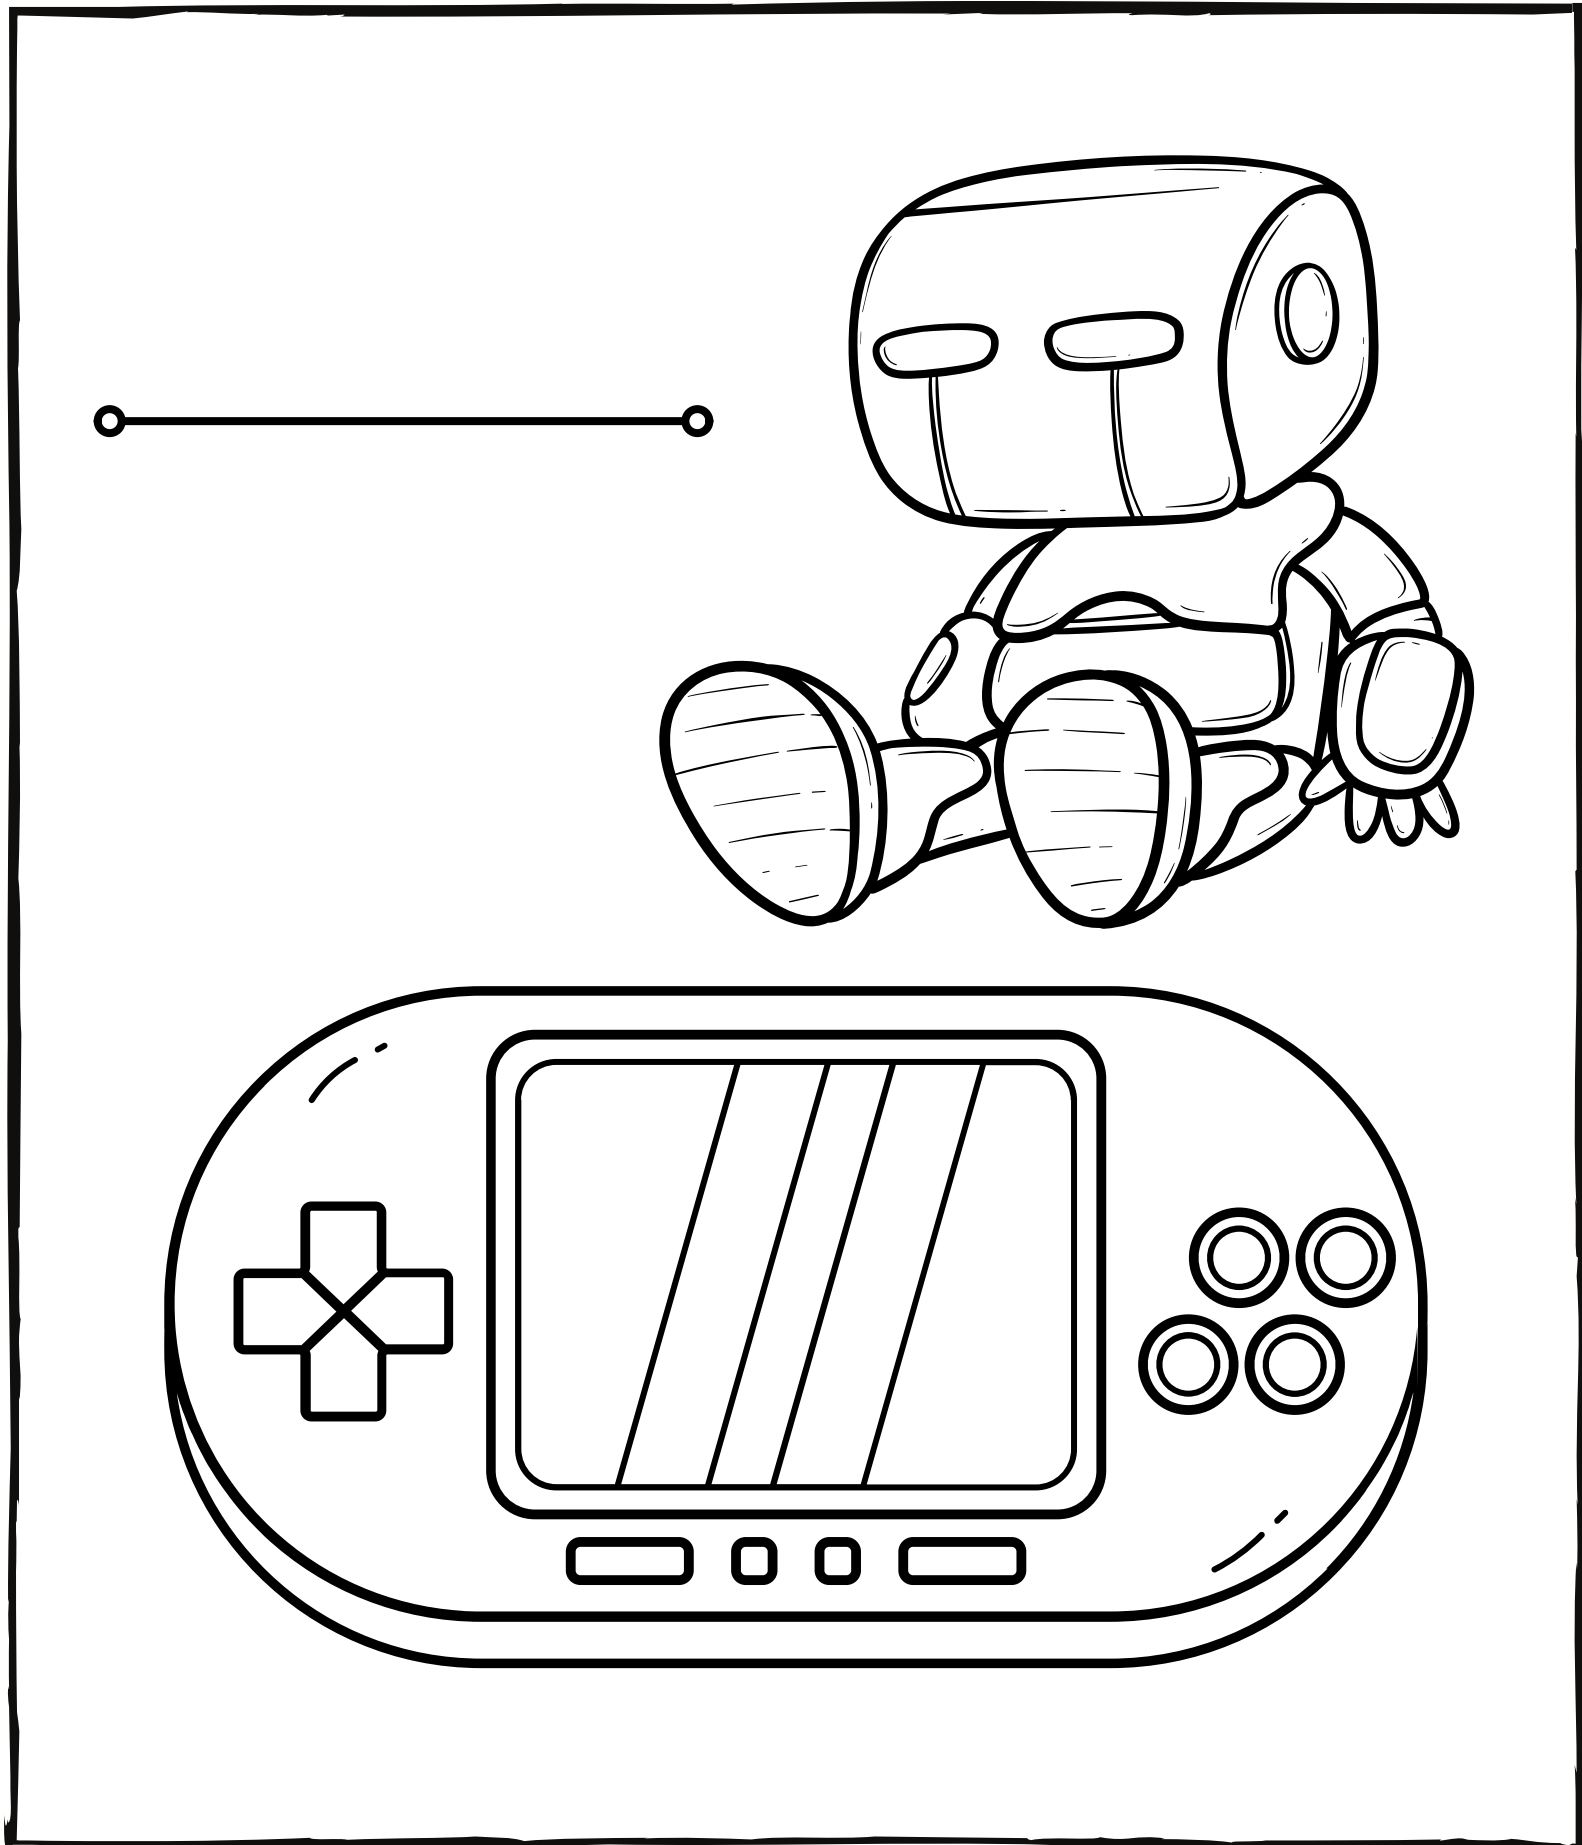

Meet Gigabot: A big, gentle bot with a giant brain

Color your robot, then draw their favorite gadget!

The ColorCore Console

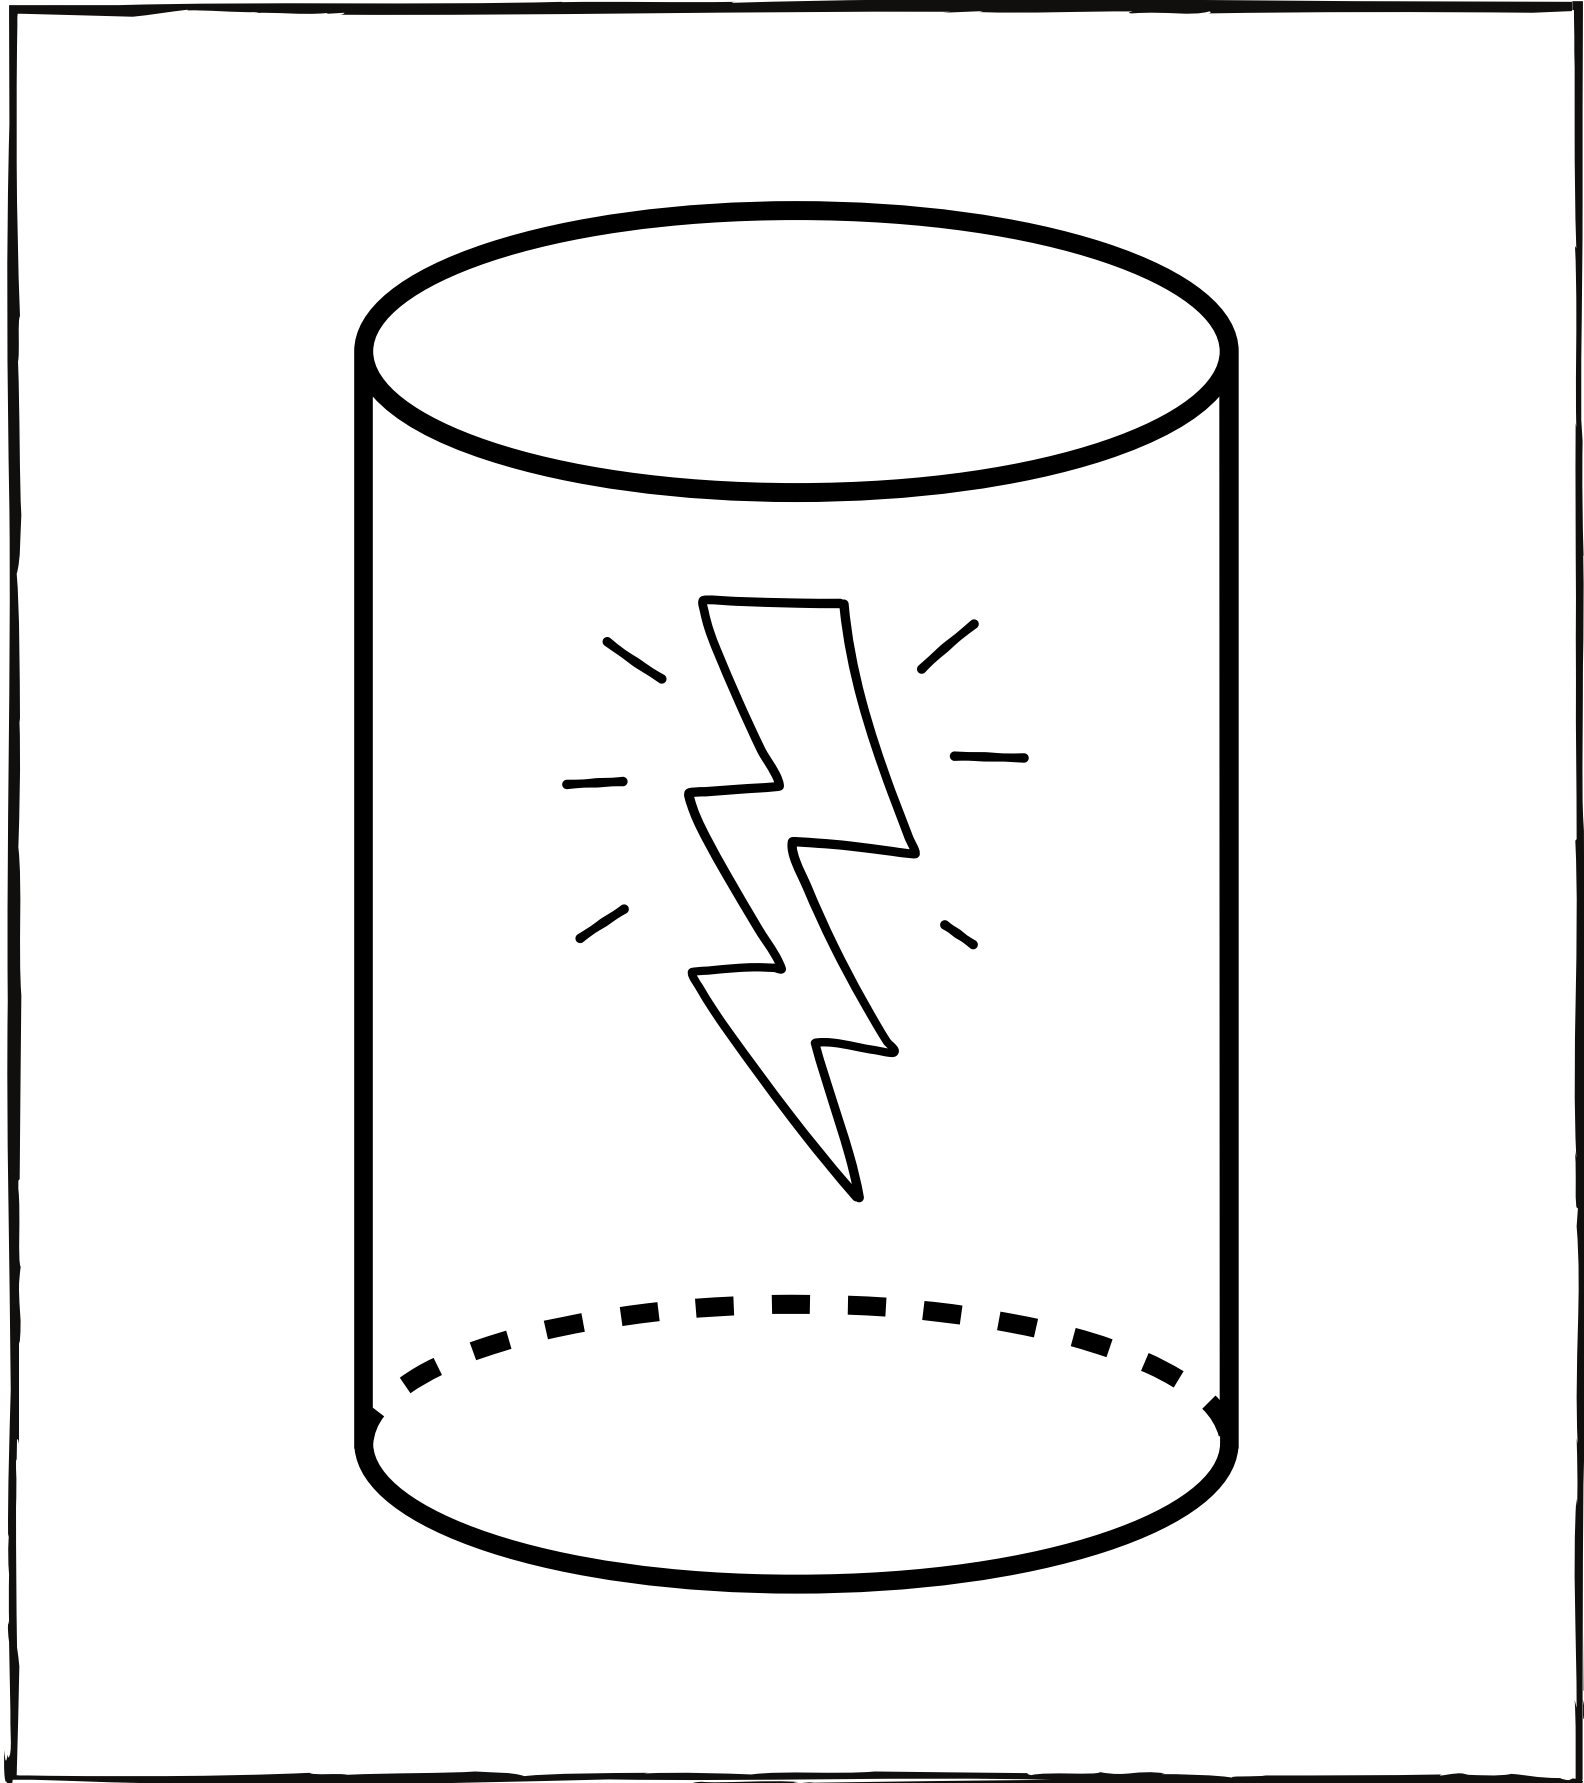

Color your device then write what special power your robot just unlocked!

Mission: Power Boost!

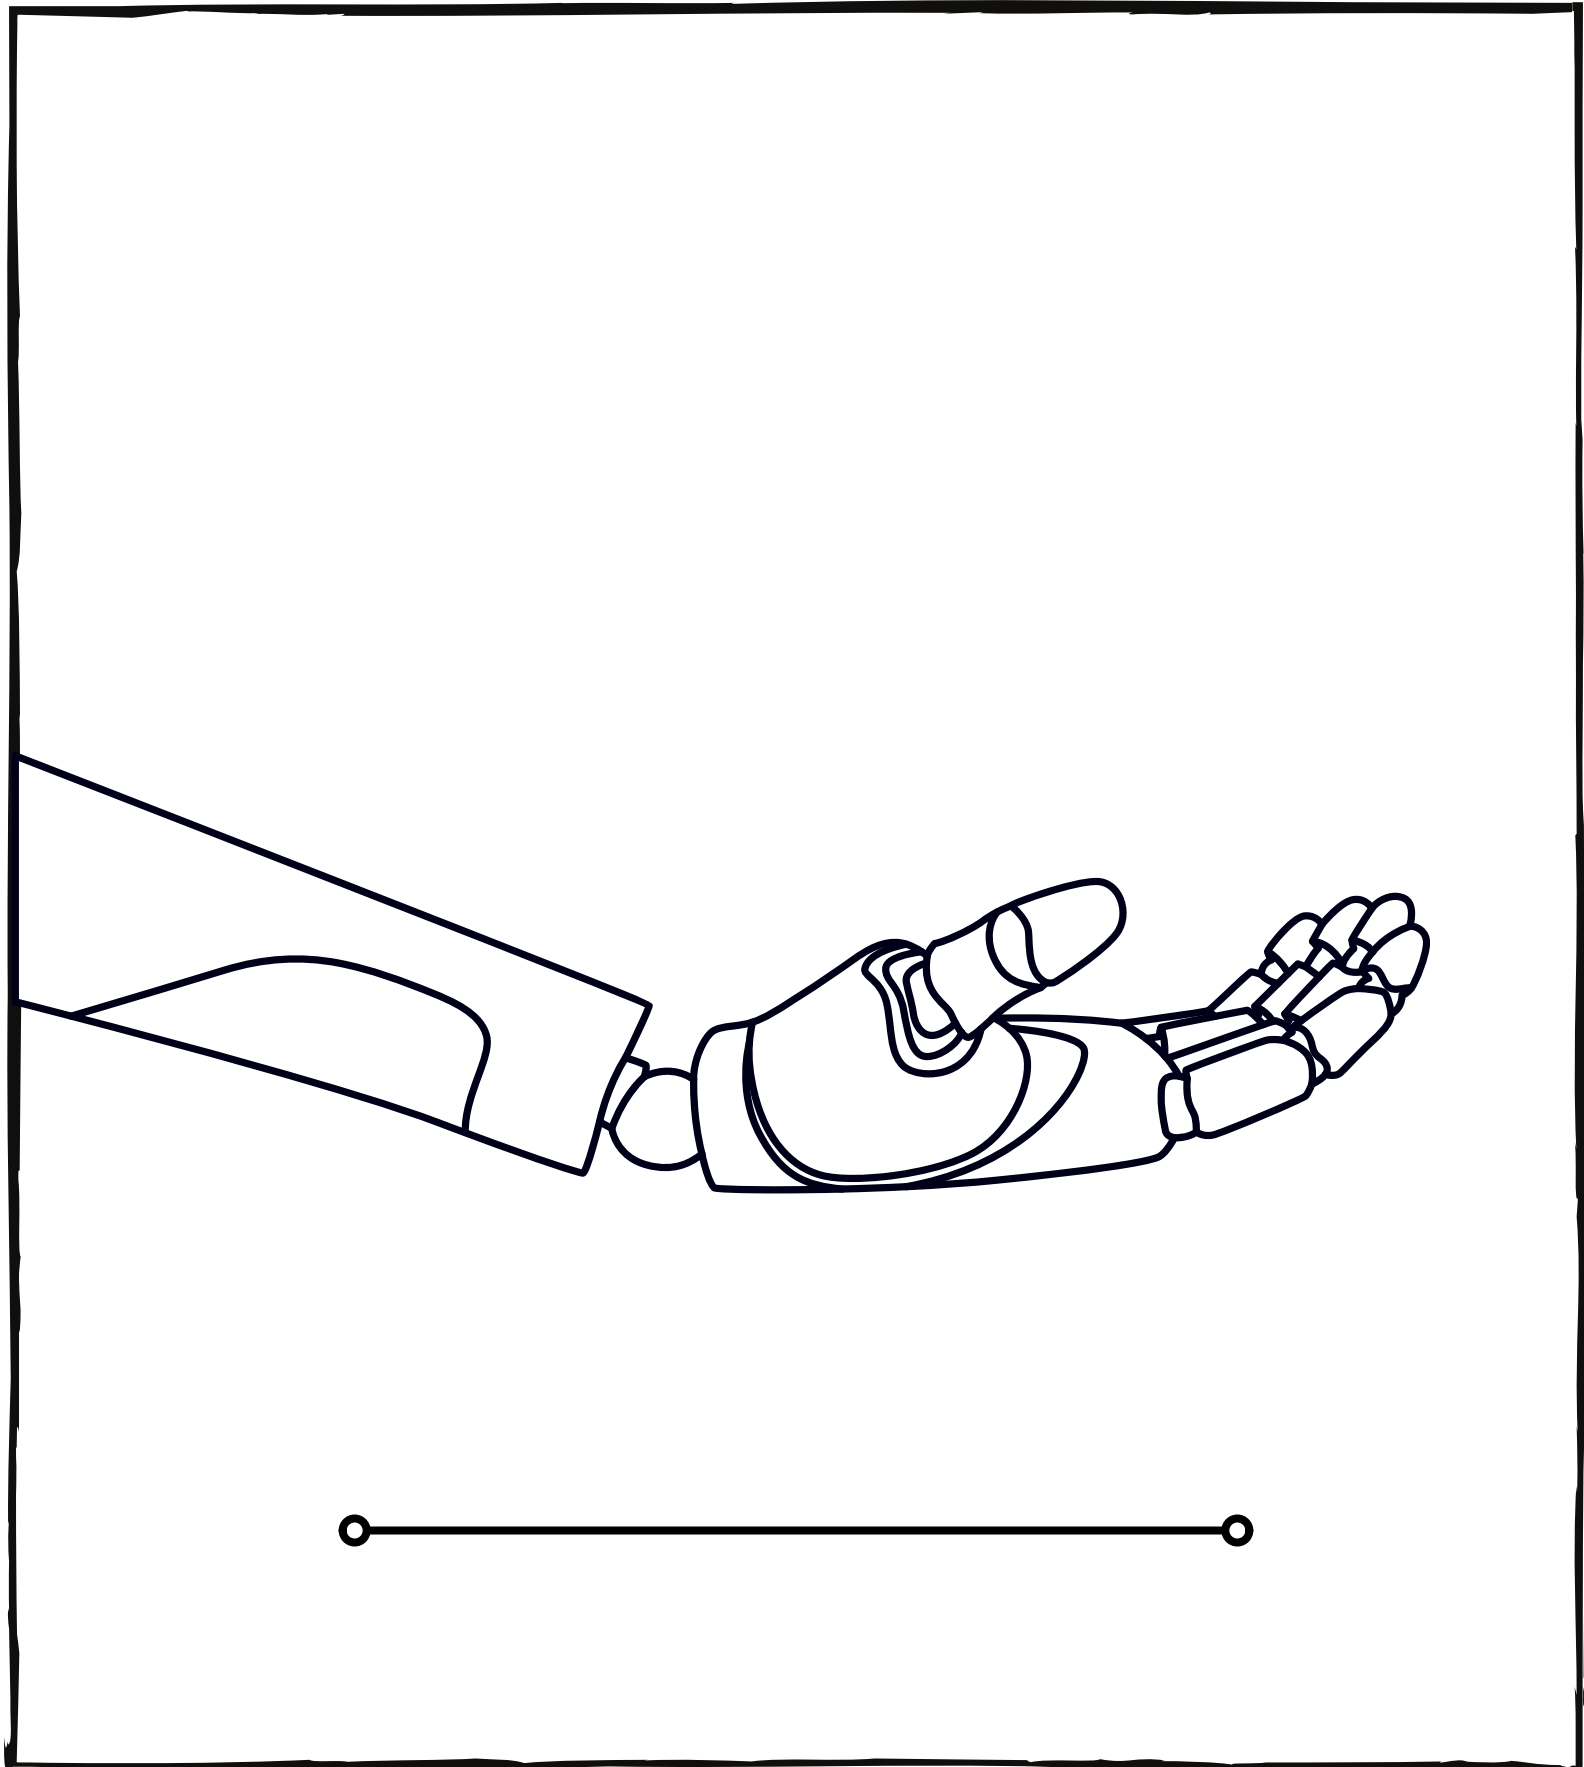

Color your robot's energy core using red, orange, and yellow.

What new superpower does it unlock?

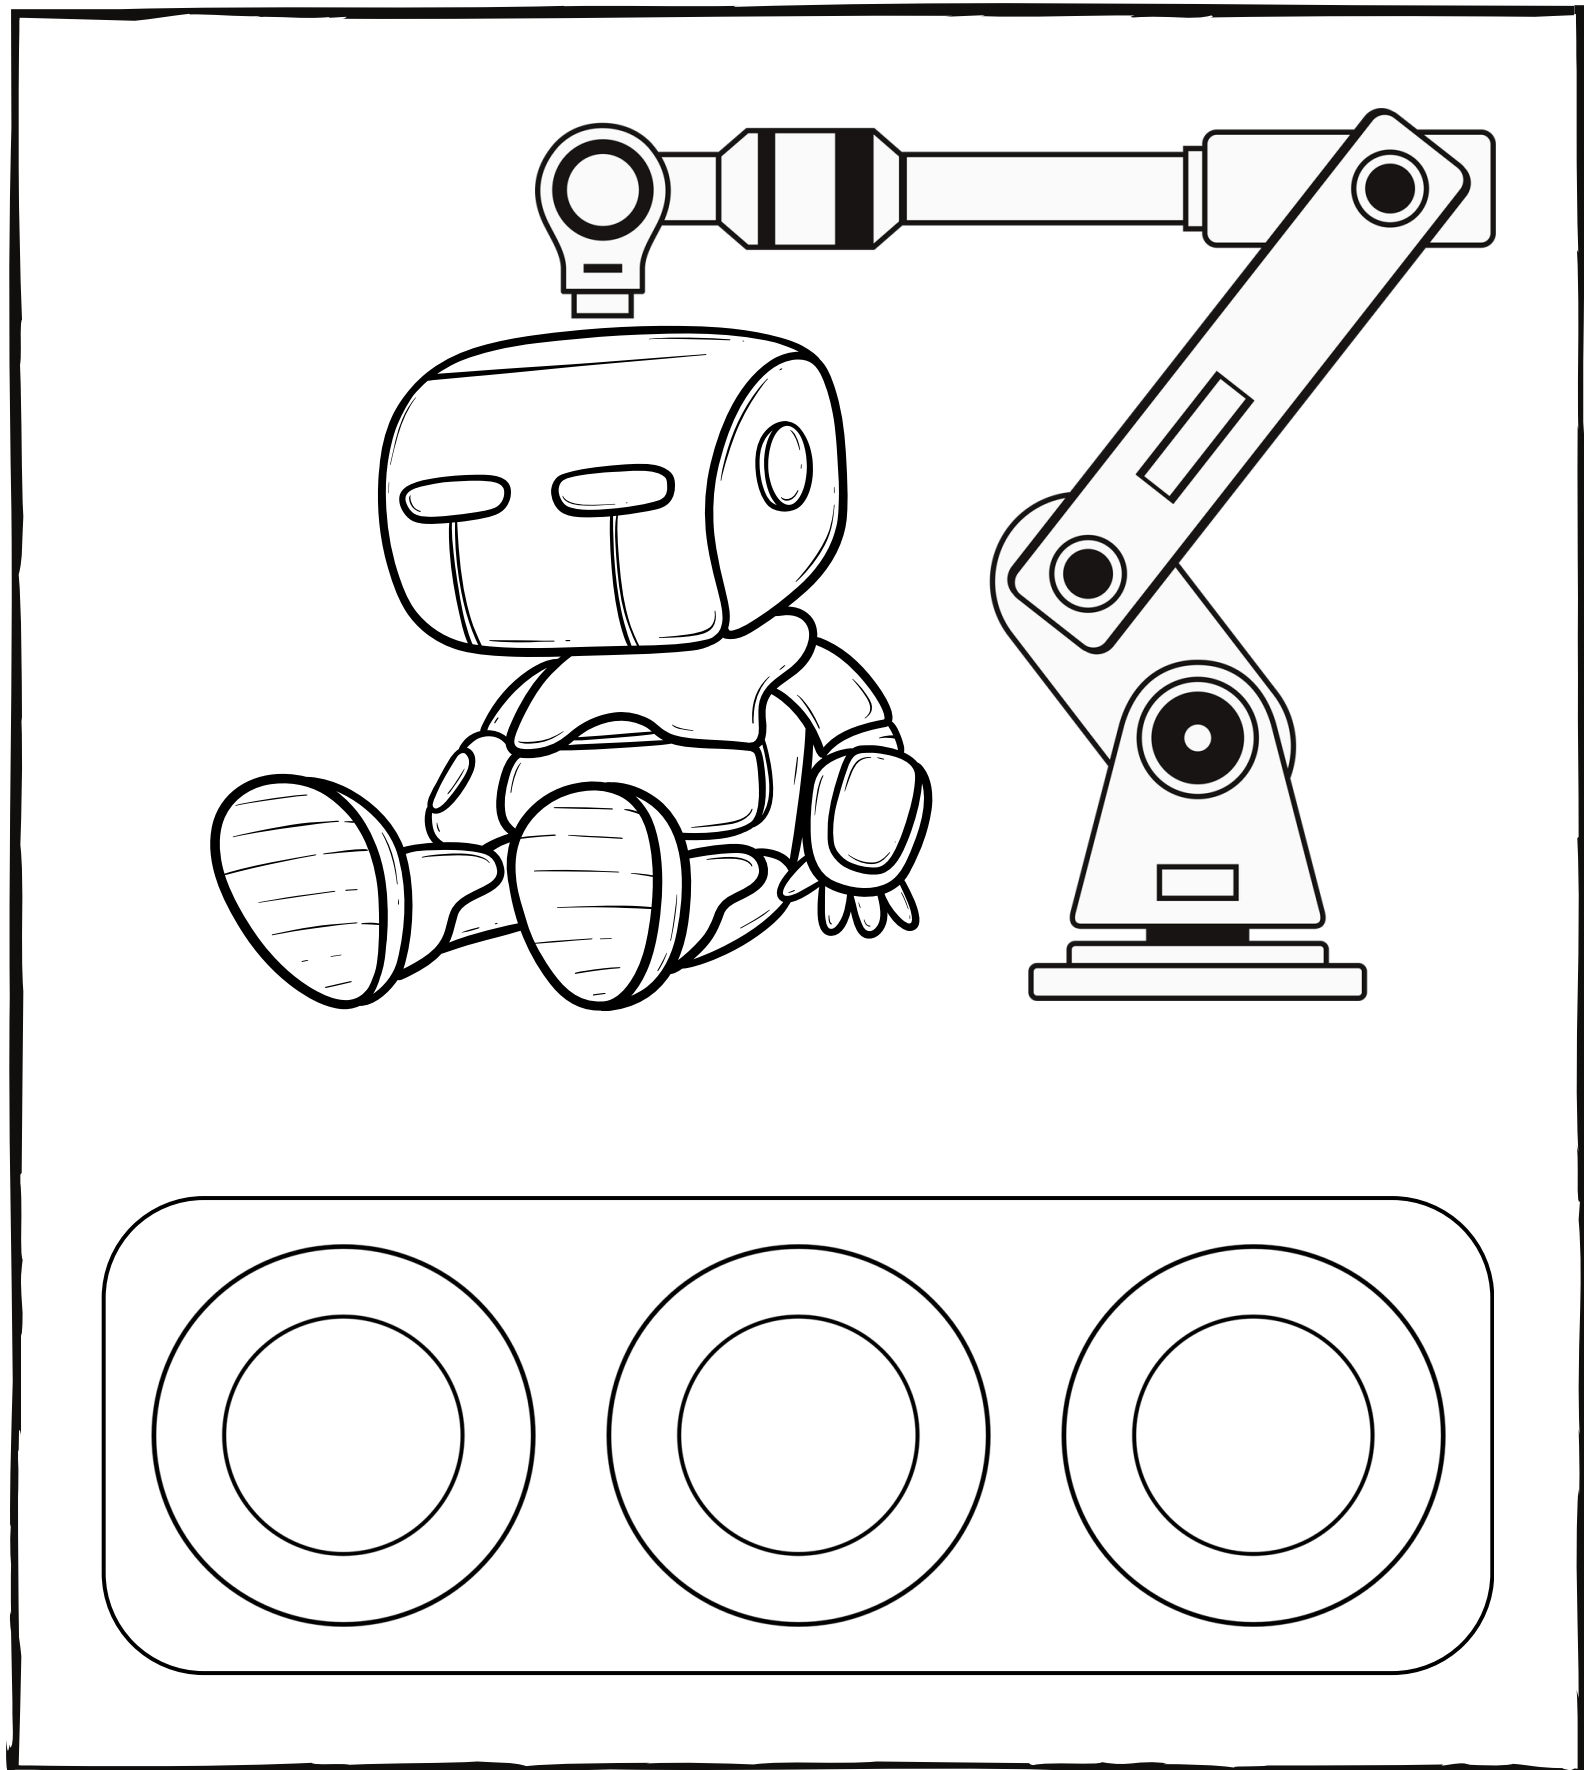

Add a Secret Tool!

Every robot needs a surprise gadget. Draw one in your robot's hand and give it a cool name.

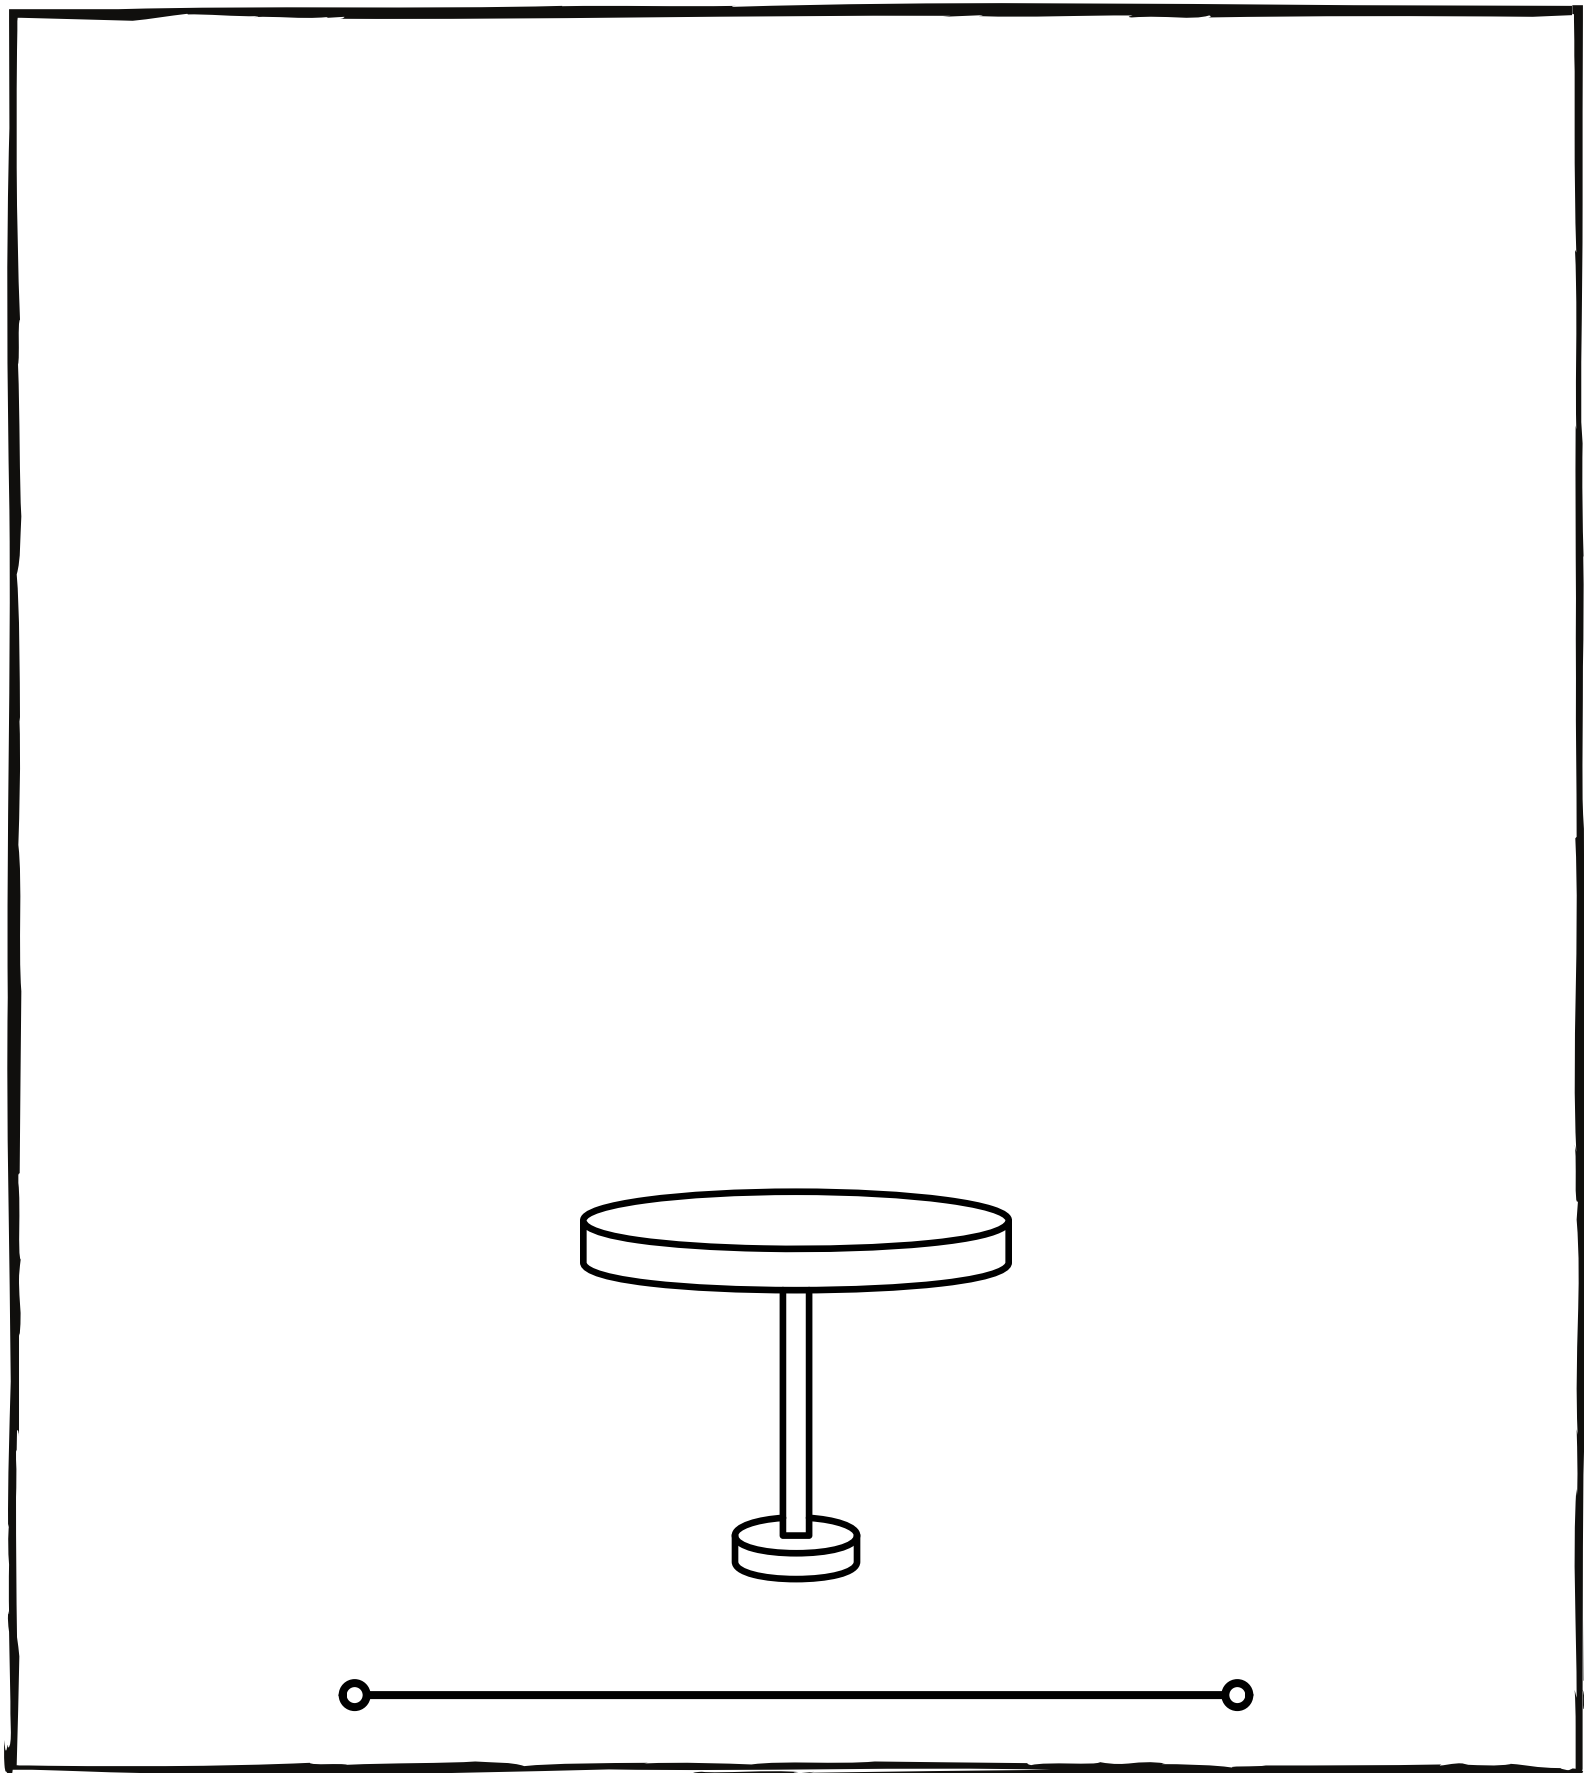

Customize the Control Panel

Design 3 buttons for your robot's chest screen. What do they each do?
(Hint: One can be for flying, one for invisibility, and one for dance mode!)

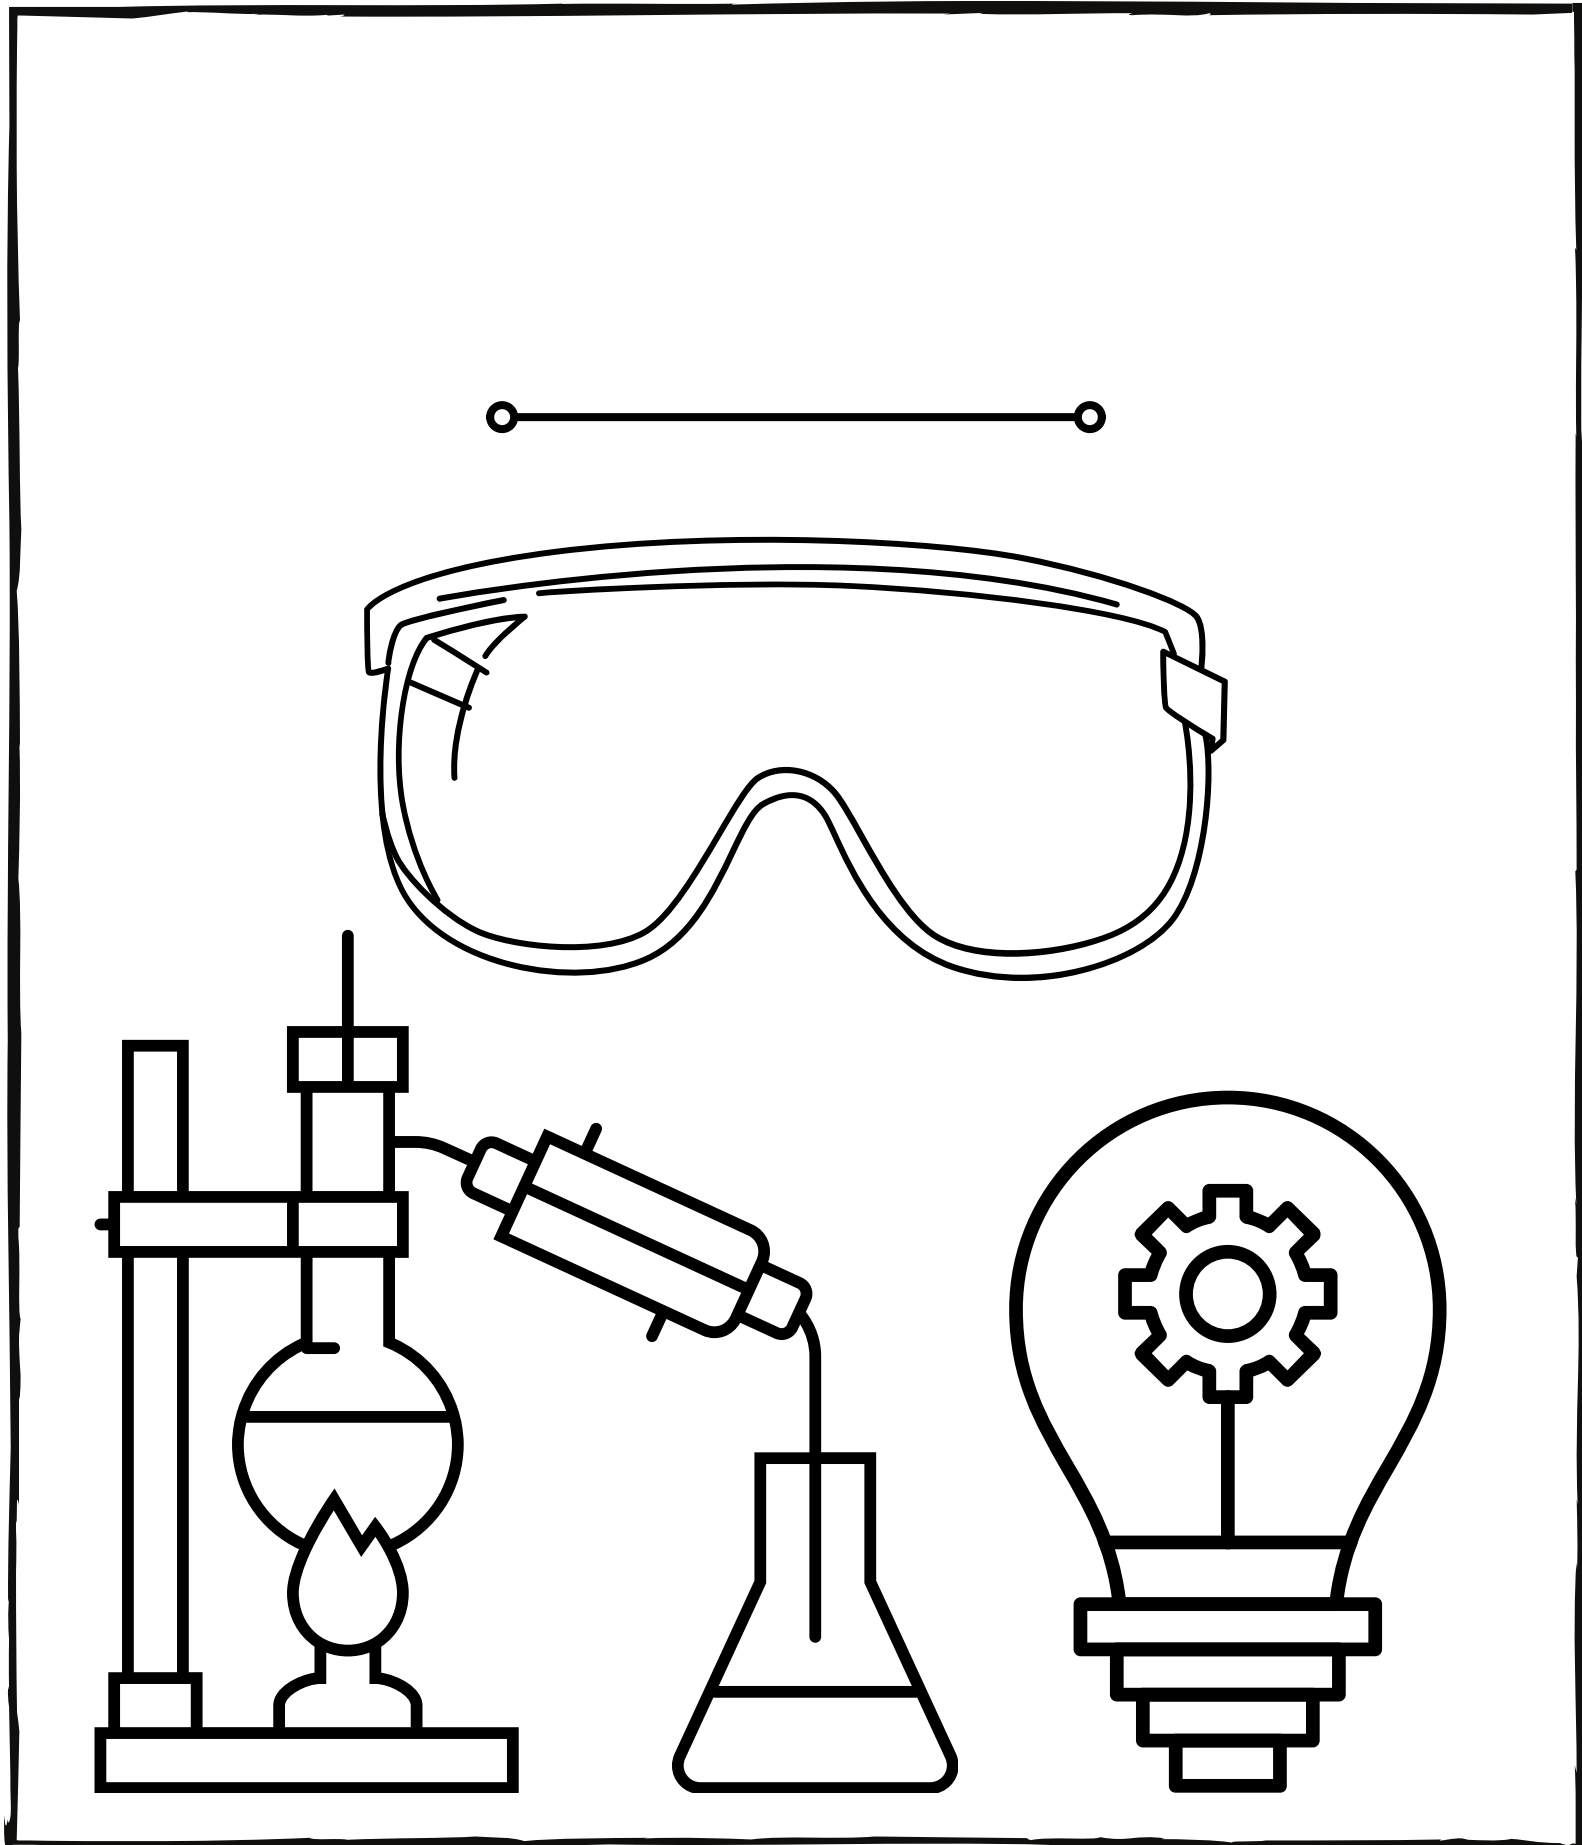

Invent a Sidekick!

Draw your robot's mini helper! What's their name and special skill?

Upgrade Your Robot. Mission: Power Boost!

Color your tools then write what special power your robot just unlocked!

FROM THE AUTHOR

♥ I loved bringing these pages to life — they're filled with imagination, inspiration, and a little STEM sparkle.

♥ I grew up with big questions and even bigger curiosity, and I made this book for kids just like that: curious, creative, and ready to build the future.

♥ I hope these pages make you smile, dream big, and remember — tech isn't just smart... it's magical.

Keep creating,
Taylor
